China Economics

26H2 Outlook: AI Supercycle Cuts into the K-shaped Economy

CITI'S TAKE

AI is now front and center in [China's K-shaped economy](#). The AI supercycle further powers the strong leg – exports, production and the new economy. Meanwhile, [AI-driven job displacement](#) weighs on consumer confidence, and the significant AI buildout risks crowding out old economy investment. Overall trickle-down has been limited, with the weak leg fragmenting into distinct winners and losers across sectors and geographies. Policy will likely stay targeted against this backdrop. We maintain our 4.7% growth forecast for 2026E, with 26Q2 likely the low point. The July Politburo should signal piecemeal consumer support – not broad-based stimulus, in our view. An outright deficit expansion is not our base case, but we believe fiscal deployment is set to accelerate. While monetary policy is not in the driver's seat, we keep our call for a symbolic 10bps rate cut in 26H2E.

AI has become the defining force shaping China's K-shaped economy. We have characterized China's post-Covid recovery along two dimensions: [1] supply consistently outpacing domestic demand, with exports filling the gap; and [2] the new economy outperforming the old (see: [China Outlook 2026: Mind the Gap](#)). The DeepSeek moment in early 2025 helped materially accelerate the AI-centric new economy, which has since broadened its macro footprint through intensifying AI deployment. The AI supercycle deepens the existing fault lines (Figure 1).

- **Widening divergence:** The AI supercycle is powering production, exports, and new economy activity, reinforcing the strong leg of the K. At the same time, AI-driven labor displacement risks – while not yet material – are weighing on consumer confidence (see: [The Macro-Micro Disconnect of AI-Driven New Economy](#)). The significant AI buildout also risks crowding out old economy investment.
- **Domestic fragmentation:** The AI supercycle is creating distinct winners and losers across sectors and geographies, even as overall trickle-down to the old economy has been limited. The weak leg is no longer monolithic – AI-adjacent industries, cities, and even individuals are pulling ahead, against an otherwise sluggish backdrop.
- **“AI-first policy”:** Despite the policy rhetoric of “employment-first” and “investing in people”, the “AI+” initiative is clearly the strategic focus in practice. We believe, so long as social stability holds, facilitating the AI transition sits at the top of the policy hierarchy. With the growth target revised down, the urgency for broad-based cyclical stimulus appears low to us – reinforcing a selective, tech-oriented policy posture.

We maintain our growth forecast at 4.7%YoY for 2026E. The AI supercycle anchors the headline number, particularly [through supply-side strength](#). 26Q2 is likely to be a low point in the quarterly trajectory, partly due to the Middle East shock and lagging fiscal deployment. On prices, the energy shock has driven the first leg of PPI reflation; we believe anti-involution and AI inflation are poised to drive the next. We reckon nominal growth could reach a five-year high of 6.7% in 2026E.

We expect targeted, piecemeal support to domestic demand ahead – not broad-based big stimulus. Structural efforts such as the [“Six Networks” initiative](#) are underway, enabling AI adoption and stabilizing investment. We see a good chance that the July Politburo meeting (held on the 30th in 2025) may signal incremental measures to support consumption and household income. That said, an outright increase in the budget deficit or special government bond quota is not our base case. While monetary policy is not in the driver’s seat, we keep our call for a symbolic 10bps rate cut in 26H2E. We expect the PBoC to maintain its managed appreciation bias on the exchange rate to facilitate [RMB internationalization](#) and see USDCNY edging towards 6.7.

The AI economy takes off

The AI economy is shifting from intangible algorithm development to tangible infrastructure buildout. The DeepSeek moment settled a pivotal question – China can innovate in AI. OpenClaw and the rise of agentic AI have since recharged the momentum, further cementing the trend as the most significant technological transition for China in decades (Figure 2). The shift is visible across at least three dimensions:

- **Token:** China’s daily token usage hit 140trn in March 2026, up from 0.1trn at the beginning of 2024 (Figure 3).
- **Computing power:** China’s intelligent computing tripled in 2025 vs. 2024, according to MIIT data (Figure 4).
- **Equity market:** AI-related outperformance has rotated from internet giants to semiconductor manufacturers and materials providers – mirroring the broader shift from intangible algorithm development to tangible infrastructure buildout (Figure 5).

AI is now front and center in China’s K-shaped economy. The post-Covid recovery has been bifurcated with supply outpacing demand (Figure 6), external demand ahead of domestic demand (Figure 7), and the new economy leading the old. **The unfolding AI supercycle is set to widen the divergence and create further fragmentation within the weak leg, in our view.**

A further boost to the strong leg

The AI supercycle serves as [another boost to exports](#), as evidenced by the strong growth seen so far. Even if export momentum were to subside, we believe China's own AI-transition demand could sustain production.

Exports: from cyclical strength to structural tailwind

China's export boom this year is more structural than cyclical. Three features stand out:

- **AI hardware:** AI-related exports – spanning upstream chips, midstream power equipment, and downstream personal electronics – accounted for 20.3% of China's total exports in 2025 (Figure 8). Growth accelerated to 34.8%YoY in Jan-May 2026, contributing 6.8ppts to headline export growth of 15.6%YoY over the

same period (Figure 9). With the global AI transition still in its early stages, this strength is unlikely to falter soon.

- **Prices:** PPI reflation, which kicked in from March, contributed ~5ppts to export growth of 14.0%YoY in April (latest available), with AI-related items logging price surges across the supply chain (Figure 10). This dynamic is translating into meaningful revenue and [profit growth](#) – profits in telecom equipment manufacturing jumped 107.7%YoY in Jan–April.
- **Energy transition:** The global energy transition, amplified by [the Middle East conflict](#), provides a further tailwind to China’s “New Three” exports (Figure 11). Growth reached 51.5%YoY in the first five months of 2026, contributing 2.2ppts to the headline.

We revise up our export growth forecast to 13.0%YoY for 2026E. Imports could also stay buoyant at 22.0%YoY, leaving the trade surplus at US\$1.1trn. Structural drivers – unlike the competitiveness-led cyclical support of 2024–25 – are likely to prove more resilient.

Protectionism poses downside risks but is unlikely to derail China’s export growth. On the US-China front, risks appear well contained following [the IEEPA ruling](#) and [the summit between President Trump and President Xi](#) in Beijing, not to mention potentially more presidential meetings in 26H2E. EU risks are rising, with further measures against Chinese exporters in preparation ([Reuters](#), Jun 18, 2026). That said, the US precedent could be instructive: despite accounting for 14.6% of China’s exports in 2024 and peak tariffs of ~145%, China’s exports held up throughout the year. The EU now represents a similar 14.9% share; how aggressive its measures will be remains to be seen. Protectionism risk may be real but not significant enough to derail growth, in our view.

Figure 8. AI-related exports generally accounted for 20.3% of China’s total exports in 2025

Category	Subcategory	CN Exports, US\$ bn (2025)
Upstream	Semiconductors & Integrated Circuits	216.4
Upstream	Printed Circuit Boards & Electronic Assembly	35.9
Upstream	Memory & Storage Components	4.0

Production: high-tech takes the wheel

Production could prove even more resilient than the export cycle. China's own AI-driven demand is pushing high-tech production higher – and could sustain momentum even if export growth were to subside.

- **High-tech IP** rose 13.1%YoY Ytd, with the monthly rate accelerating to a five-year high of 15.1%YoY in May. Despite carrying a weight of ~17%, its [contribution to headline IP](#) has exceeded 50% (Figure 12). Elsewhere in the industrial complex, resilience is wearing thin.
- **AI-related output growth** is gaining momentum. IC output expanded 25.4%YoY in Jan-May, while export volumes only grew 8.8%YoY – with ¾ of the increase directed towards domestic use. Industrial robot output grew 28.1%YoY, reflecting AI's growing footprint in manufacturing (Figure 13).

Rising fragmentation in the weak leg

The booming new economy offers little relief to the weak leg of the K-shaped economy. The AI supercycle is creating distinct winners and losers across sectors and cities, rather than supporting a broad-based recovery. At best, the new economy generates sporadic rebounds in domestic demand.

Consumption & property: sporadic gains, no broad recovery

AI-driven job displacement risks could weigh further on already subdued consumer confidence. Early to assess [AI's job market impact in China](#), we estimate that ~70.3mn jobs face displacement risk from AI deployment. With [adoption gaining traction](#), displacement could start to surface – most visibly in new hiring, particularly among college graduates.

- **Consumer confidence** dipped further in April from an already subdued level (Figure 14). The index has been trending below the neutral benchmark of 100 for 50 consecutive months since April 2022. The decline coincided with rising equity market volatility and [the above-seasonal increase](#) in unemployment in March – before normalization in April.
- **Household risk appetite** stays low. Net loan repayments reached RMB631bn in the first five months of 2026 (Figure 15), with [deposit reallocation](#) only beginning to stir. Households still hold RMB28.4trn in excess deposits as of May relative to the linear trend, and the saving rate remained elevated at 41.8% in 26Q1 vs. 38.5% in 19Q1.
- **Policy impulse** is fading. Consumption policies have been steady, yet the high base from 2025 and lagging fiscal deployment drove an outright contraction in retail sales of -0.6%YoY in May – the first decline since Covid (Figure 16).

The new economy could, at best, generate sporadic gains within the weak leg. In property, Tier-1 city prices have stabilized, while the national index continues to search for a bottom (Figure 17), with AI startups and hardware suppliers concentrated in major city clusters. Luxury sales have also held up despite the headwind from the Middle East conflict ([SCMP](#), May 25, 2026).

Investment: AI buildout leads, the rest lags

AI-related investment is building its own momentum, while headwinds gather for the rest. With fiscal resources constrained, the significant AI buildout also risks crowding out old economy investment.

- **AI:** IT-related FAI stays buoyant even as headline FAI retreats. [Citi's tech team](#) estimates ~RMB641bn in domestic capex across hyperscalers and third-party data centers. IT services FAI surged 13.8%YoY in Jan-May, and telecom equipment manufacturing FAI rose 6.7%YoY over the same period (Figure 18). [The ongoing "Six Networks" initiative](#) should provide an additional tailwind.
- **Other:** Headwinds for the rest are mounting, driven by [1] lagging fiscal deployment, [2] uncertainty from the Middle East conflict, [3] anti-involution pressures, and [4] squeezed margin in downstream sectors. Notably, infrastructure investment posted a double-digit decline in May, despite the buoyant new-infrastructure buildout (Figure 19).

Figure 18. IT-related FAI stays buoyant even as headline FAI retreats, with IT services at 13.8%YoY

Reflation: not all boats are lifted

The long-awaited PPI reflation has arrived, broader than an energy shock but very uneven. The Middle East conflict drove the initial leg, while broad AI supply chains and construction costs are now extending the recovery (Figure 20). Profit rebounds through April remain concentrated in a handful of sectors, led by upstream and AI-related industries (Figure 21).

The uneven reflation could continue into 26H2E. We maintain our inflation forecasts at 1.0%YoY for CPI and 2.8%YoY for PPI (Figure 22). Peak PPI momentum may now be behind us, with a potential [resolution to the Middle East conflict](#). From here, reflation likely hinges on the AI economy and anti-involution dynamics – we expect a considerably milder pace ahead. With domestic demand remaining sluggish, meaningful passthrough from PPI to CPI is unlikely, in our view, echoing the 2016–17 episode. Downstream sectors face a difficult squeeze between weak end-demand and rising costs, keeping profit margins under pressure (Figure 23). This reflation may not lift all boats.

Figure 20. The Middle East conflict drove the initial leg, while broad AI supply chains extend the recovery

Figure 22. We maintain our inflation forecasts at 1.0%YoY for CPI and 2.8%YoY for PPI

Figure 21. Profit rebounds through April remain concentrated in a handful of sectors

Figure 23. Downstream sectors face a difficult squeeze between weak end-demand and rising costs

Realistic policy expectations

Will policymakers pivot proactively to close the gap? We think not – at least not in 2026. The AI-driven new economy may prove sufficient to keep headline growth on track to meet [the downgraded target](#). Despite the sharp slowdown in 26Q2, we maintain our full-year forecast at 4.7%YoY for 2026E, with 26Q2E at 4.5%YoY. 26Q2 is likely to be the low point of the year, as the drag from the Middle East conflict fades and base effects turn more favorable. We expect a modest recovery to ~4.7%YoY in 26H2E.

The “AI+” initiative is clearly the strategic priority in practice, despite the policy rhetoric of “employment-first” and “investing in people”. [The 15th Five-Year Plan's](#) great emphasis on technology, innovation, and industrial upgrading provides longer-term underpinning for the strong leg of the economy. We believe, so long as social stability holds, facilitating the AI transition sits at the top of the policy hierarchy. The weak leg, while a concern, may not be soft enough to trigger an imminent policy pivot. We expect targeted, piecemeal support to domestic demand ahead – not broad-based big stimulus.

- **Monetary policy:** We maintain our call for a symbolic 10bps policy rate cut in 26H2E, with risks skewed to the earlier side (Figure 24). Monetary policy is not in the driver's seat during the AI transition – credit growth, once the most powerful leading indicator, no longer reliably leads the economic cycle. Even ahead of this year's AI boom, new credit had already shifted away from property. The AI economy, at least in its initial stage, relies more on internal funding, PE/VC, and government-guided funds – channels not captured by loans or Total Social Financing. Ongoing AI buildout could redirect funding back to traditional bank lending, though not at a scale sufficient to drive a meaningful rebound in loan growth. Financial reform and regulation are likely to be a focus in the interim, as the PBoC refines [its interest rate corridor](#).
- **Fiscal policy:** An outright increase in the budget deficit or special government bond quota is not our base case. We anticipate an acceleration in fiscal deployment ahead. [The NPC](#) this year left the fiscal stance largely unchanged from 2025, and implementation has lagged: special bond issuance has been less aggressive (Figure 25), the issuance of special CGBs for bank recapitalization has been postponed ([STCN](#), May 23, 2026), and there has been limited update on the RMB800bn policy-financing tool. Fiscal expenditure for budget and government funds combined has contracted for three months in a row (Figure 26), putting the MoF in *de facto* austerity. A partial reversal alone could send fiscal impulse higher into 26H2E, even without additional measures (Figure 27).
- **Targeted support:** Fiscal acceleration, in our view, will likely be biased towards facilitating the AI transition. [The “Six Networks” initiative](#) is underway, enabling AI adoption and stabilizing investment. We see a good chance that the July Politburo meeting (held on the 30th in 2025) could signal incremental measures to support consumption and household income. Further details on the *Action Plan to Increase Household Income* are the key watch points – though we don't foresee decisive fiscal action on implementation this year. Separately, policy actions around anti-involution are gaining traction as well.

Market Implications

Equity and rates markets are caught in the great divide of the K-shaped economy. The equity market remains a key consideration in the policy calculus (Figure 29) – and the ongoing, if narrow, nominal deflation provides a supportive backdrop. Rates, by contrast, are more anchored to old economy dynamics and are likely to remain rangebound at low levels, in our view (Figure 30).

Figure 29. The equity market remains a key consideration in the policy calculus

Source: NBS, PBoC, Wind, Citi Research

The RMB exchange rate remains the most flexible lever in China's economy and markets. FX settlement – now at a decade high – is the primary driver of USDCNY, in our view (Figure 31). Exporter's conversion ratio has also recovered to a five-year high (Figure 32). We expect the PBoC to maintain its managed appreciation approach, using the exchange rate to complement its [RMB internationalization initiative](#) during this strategic window. We maintain our USDCNY target of 6.7 on a 6-12m horizon, despite Citi's house view of a strengthening US dollar into 26H2E.

Appendix A-1

ANALYST CERTIFICATION

The research analysts primarily responsible for the preparation and content of this research report are either (i) designated by "AC" in the author block or (ii) listed in bold alongside content which is attributable to that analyst. If multiple AC analysts are designated in the author block, each analyst is certifying with respect to the entire research report other than (a) content attributable to another AC certifying analyst listed in bold alongside the content and (b) views expressed solely with respect to a specific issuer which are attributable to another AC certifying analyst identified in the price charts or rating history tables for that issuer shown below. Each of these analysts certify, with respect to the sections of the report for which they are responsible: (1) that the views expressed therein accurately reflect their personal views about each issuer and security referenced and were prepared in an independent manner, including with respect to Citigroup Global Markets Inc. and its affiliates; and (2) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in this report.

IMPORTANT DISCLOSURES

Citigroup Global Markets Inc. or its affiliates has received compensation for investment banking services provided within the past 12 months from China, United States.

Citigroup Global Markets Inc. or its affiliates expects to receive or intends to seek, within the next three months, compensation for investment banking services from China.

Citigroup Global Markets Inc. or its affiliates received compensation for products and services other than investment banking services from China, United States in the past 12 months.

Citigroup Global Markets Inc. or its affiliates currently has, or had within the past 12 months, the following as investment banking client(s): China, United States.

Citigroup Global Markets Inc. or its affiliates currently has, or had within the past 12 months, the following as clients, and the services provided were non-investment-banking, securities-related: China, United States.

Citigroup Global Markets Inc. or its affiliates currently has, or had within the past 12 months, the following as clients, and the services provided were non-investment-banking, non-securities-related: China, United States.

Citigroup Global Markets Inc. and/or its affiliates has a significant financial interest in relation to China, United States. (For an explanation of the determination of significant financial interest, please refer to the policy for managing conflicts of interest which can be found at www.citiVelocity.com.)

Analysts' compensation is determined by Citi Research management and Citigroup's senior management and is based upon activities and services intended to benefit the investor clients of Citigroup Global Markets Inc. and its affiliates (the "Firm"). Compensation is not linked to specific transactions or recommendations. Like all Firm employees, analysts receive compensation that is impacted by overall Firm profitability which includes investment banking, sales and trading, and principal trading revenues. One factor in equity research analyst compensation is arranging corporate access events between institutional clients and the management teams of covered companies. Typically, company management is more likely to participate when the analyst has a positive view of the company.

For financial instruments recommended in the Product in which the Firm is not a market maker, the Firm is a liquidity provider in such financial instruments (and any underlying instruments) and may act as principal in connection with transactions in such instruments. The Firm is a regular issuer of traded financial instruments linked to securities that may have been recommended in the Product. The Firm regularly trades in the securities of the issuer(s) discussed in the Product. The Firm may engage in securities transactions in a manner inconsistent with the Product and, with respect to securities covered by the Product, will buy or sell from customers on a principal basis.

Unless stated otherwise neither the Research Analyst nor any member of their team has viewed the material operations of the Companies for which an investment view has been provided within the past 12 months.

For important disclosures (including copies of historical disclosures) regarding the companies that are the subject of this Citi Research product ("the Product"), please contact Citi Research, 388 Greenwich Street, 6th Floor, New York, NY, 10013, Attention: Legal/Compliance [E6WYB6412478]. In addition, the same important disclosures, with the exception of the Valuation and Risk assessments and historical disclosures, are contained on the Firm's disclosure website at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures. Valuation and Risk assessments can be found in the text of the most recent research note/report regarding the subject company. Pursuant to the Market Abuse Regulation a history of all Citi Research recommendations published during the preceding 12-month period can be accessed via Citi Velocity (<https://www.citivelocity.com/cv2>) or your standard distribution portal. Historical disclosures (for up to the past three years) will be provided upon request.

RESEARCH ANALYST AFFILIATIONS / NON-US RESEARCH ANALYST DISCLOSURES

The legal entities employing the authors of this report are listed below (and their regulators are listed further herein). Non-US research analysts who have prepared this report (i.e., all research analysts listed below other than those identified as employed by Citigroup Global Markets Inc.) are not registered/qualified as research analysts with FINRA. Such research analysts may not be associated persons of the member organization (but are employed by an affiliate of the member organization) and therefore may not be subject to the FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Citigroup Global Markets Asia Limited

Xinyu Ji; Xiangrong Yu; Yuanliu Hu

OTHER DISCLOSURES

Any price(s) of instruments mentioned in recommendations are as of the prior day's market close on the primary market for the instrument, unless otherwise stated.

The completion and first dissemination of any recommendations made within this research report are as of the Eastern date-time displayed at the top of the Product. If the Product references views of other analysts then please refer to the price chart or rating history table for the date/time of completion and first dissemination with respect to that view.

European regulations require that where a recommendation differs from any of the author's previous recommendations concerning the same financial instrument or issuer that has been published during the preceding 12-month period that the change(s) and the date of that previous recommendation are indicated. Please refer to the trade history in the published research or contact the research analyst.

Citi Research has implemented policies for identifying, considering and managing potential conflicts of interest arising as a result of publication or distribution of investment research. A description of these policies can be found at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.

The proportion of all Citi Research research recommendations that were the equivalent to "Buy", "Hold", "Sell" at the end of each quarter over the prior 12 months (with the % of these that had received investment firm services from Citi in the prior 12 months shown in brackets) is as follows; Q1 2026 Buy 33%(63%), Hold 44% (52%), Sell 23% (46%), RV 0.5% (89%); Q4 2025 Buy 33% (63%), Hold 44% (50%), Sell 23% (46%), RV 0.4% (91%); Q3 2025 Buy 33% (61%), Hold 44% (52%), Sell 23% (50%), RV 0.4% (80%); Q2 2025 Buy 33%(63%), Hold 44% (51%), Sell 23% (49%), RV 0.4% (86%). For the purposes of disclosing recommendations other than for equity (whose definitions can be found in the corresponding disclosure sections), "Buy" means a positive directional trade idea; "Sell" means a negative directional trade idea; and "Relative Value" means any trade idea which does not have a clear direction to the investment strategy.

European regulations require a 5 year price history when past performance of a security is referenced. CitiVelocity's Charting Tool (https://www.citivelocity.com/cv2/#go/CHARTING_3_Equities) provides the facility to create customisable price charts including a five year option. This tool can be found in the Data & Analytics section under any of the asset class menus in CitiVelocity (<https://www.citivelocity.com/>). For further information contact CitiVelocity support (https://www.citivelocity.com/cv2/go/CLIENT_SUPPORT). The source for all referenced prices, unless otherwise stated, is DataCentral, which sources price information from LSEG Data & Analytics. Past performance is not a guarantee or reliable indicator of future results. Forecasts are not a guarantee or reliable indicator of future performance.

Investors should always consider the investment objectives, risks, and charges and expenses of an ETF carefully before investing. The applicable prospectus and key investor information document (as applicable) for an ETF should contain this and other information about such ETF. It is important to read carefully any such prospectus before investing. Clients may obtain prospectuses and key investor information documents for ETFs from the applicable distributor or authorized participant, the exchange upon which an ETF is listed and/or from the applicable website of the applicable ETF issuer. The value of the investments and any accruing income may fall or rise. Any past performance, prediction or forecast is not indicative of future or likely performance. Any information on ETFs contained herein is provided strictly for illustrative purposes and should not be deemed an offer to sell or a solicitation of an offer to purchase units of any ETF either explicitly or implicitly. The opinions expressed are those of the authors and do not necessarily reflect the views of ETF issuers, any of their agents or their affiliates.

Citigroup Global Markets India Private Limited and/or its affiliates may have, from time to time, actual or beneficial ownership of 1% or more in the debt securities of the subject issuer.

Please be advised that pursuant to Executive Order 13959 as amended (the "Order"), U.S. persons are prohibited from investing in securities of any company determined by the United States Government to be the subject of the Order. This research is not intended to be used or relied upon in any way that could result in a violation of the Order. Investors are encouraged to rely upon their own legal counsel for advice on compliance with the Order and other economic sanctions programs administered and enforced by the Office of Foreign Assets Control of the U.S. Treasury Department.

This communication is directed at persons who are "Eligible Clients" as such term is defined in the Israeli Regulation of Investment Advice, Investment Marketing and Investment Portfolio Management law, 1995 (the "Advisory Law"). Within Israel, this communication is not intended for retail clients and Citi will not make such products or transactions available to retail clients or to non-Eligible Clients. The presenter is not licensed as investment advisor or investment marketer by the Israeli Securities Authority ("ISA") and this communication does not constitute investment or marketing advice. The information contained herein may relate to matters that are not regulated by the ISA. Any securities which are the subject of this communication may not be offered or sold to any Israeli person except pursuant to a security offering exemption according to the Israeli Securities Law, 1968 and the public offering rules provided thereunder.

Citi Research broadly and simultaneously disseminates its research content to the Firm's institutional and retail clients via the Firm's proprietary electronic distribution platforms (e.g., Citi Velocity and various Global Wealth platforms). As a convenience, certain, but not all, research content may be distributed through third party aggregators. Clients may receive published research reports by email, on a discretionary basis, and only after such research content has been broadly disseminated. Certain research is made available only to institutional investors to satisfy regulatory requirements. The level and types of services provided by Citi Research analysts to clients may vary depending on various factors such as the client's individual preferences as to the frequency and manner of receiving communications from analysts, the client's risk profile and investment focus and perspective (e.g. market-wide, sector specific, long term, short-term etc.), the size and scope of the overall client relationship with the Firm and legal and regulatory constraints.

Pursuant to Comissão de Valores Mobiliários Resolução 20 and ASIC Regulatory Guide 264, Citi is required to disclose whether a Citi related company or business has a commercial relationship with the subject company. Considering that Citi operates multiple businesses in more than 100 countries around the world, it is likely that Citi has a commercial relationship with the subject company.

Securities recommended, offered, or sold by the Firm: (i) are not insured by the Federal Deposit Insurance Corporation; (ii) are not deposits or other obligations of any insured depository institution (including Citibank); and (iii) are subject to investment risks, including the possible loss of the principal amount invested. The Product is for informational purposes only and is not intended as an offer or solicitation for the purchase or sale of a security. Any decision to purchase securities mentioned in the Product must take into account existing public information on such security or any registered prospectus. Although information has been obtained from and is based upon sources that the Firm believes to be reliable, we do not guarantee its accuracy and it may be incomplete and condensed. Note, however, that the Firm has taken all reasonable steps to determine the accuracy and completeness of the disclosures made in the Important Disclosures section of the Product. The Firm's research department has received assistance from the subject company(ies) referred to in this Product including, but not limited to, discussions with management of the subject company(ies). Firm policy prohibits research analysts from sending draft research to subject companies. However, it should be presumed that the author of the Product has had discussions with the subject company to ensure factual accuracy prior to publication. Statements and views concerning ESG (environmental, social, governance) factors are typically based upon public statements made by the affected company or other public news, which the author may not have independently verified. ESG factors are one consideration that investors may choose to examine when making investment decisions. All opinions, projections and estimates constitute the judgment of the author as of the date of the Product and these, plus any other information contained in the Product, are subject to change without notice. Prices and availability of financial instruments also are subject to change without notice. Notwithstanding other departments within the Firm advising the companies discussed in this Product, information obtained in such role is not used in the preparation of the Product. Although Citi Research does not set a predetermined frequency for publication, if the Product is a fundamental equity or credit research report, it is the intention of Citi Research to provide research coverage of the covered issuers, including in response to news affecting the issuer. For non-fundamental research reports, Citi Research may not provide regular updates to the views, recommendations and facts included in the reports. Notwithstanding that Citi Research maintains coverage on, makes recommendations concerning or discusses issuers, Citi Research may be periodically restricted from referencing certain issuers due to legal or policy reasons. Where a component of a published trade idea is subject to a restriction, the trade idea will be removed from any list of open trade ideas included in the Product. Upon the lifting of the restriction, the trade idea will either be re-instated in the open trade ideas list if the analyst continues to support it or it will be officially closed. Citi Research may provide different research products and services to different classes of customers (for example, based upon long-term or short-term investment horizons) that may lead to differing conclusions or recommendations that could impact the price of a security contrary to the recommendations in the alternative research product, provided that each is consistent with the rating system for each respective product.

Investing in non-U.S. securities, including ADRs, may entail certain risks. The securities of non-U.S. issuers may not be registered with, nor be subject to the reporting requirements of the U.S. Securities and Exchange Commission. There may be limited information available on foreign securities. Foreign companies are generally not subject to uniform audit and reporting standards, practices and requirements comparable to those in the U.S. Securities of some foreign companies may be less liquid and their prices more volatile than securities of comparable U.S. companies. In addition, exchange rate movements may have an adverse effect on the value of an investment in a foreign stock and its corresponding dividend payment for U.S. investors. Net dividends to ADR investors are estimated, using withholding tax rates conventions, deemed accurate, but investors are urged to consult their tax advisor for exact dividend computations. Investors who have received the Product from the Firm may be prohibited in certain states or other jurisdictions from purchasing securities mentioned in the Product from the Firm. Please ask your Financial Consultant for additional details. Citigroup Global Markets Inc. takes responsibility for the Product in the United States. Any orders by US investors resulting from the information contained in the Product may be placed only through Citigroup Global Markets Inc.

The Citigroup legal entity that takes responsibility for the production of the Product is the legal entity which the first named author is employed by.

No portion of the Product may be reproduced or quoted in the Republic of China (Taiwan) by the press or any third parties [without the written authorization of CGMTS]. Pursuant to the applicable laws and regulations in the Republic of China (Taiwan), the recipient of the Product shall not take advantage of such Product to involve in any matters in which the recipient may have conflicts of interest. If the Product covers securities which are not allowed to be offered or traded in the Republic of China (Taiwan), neither the Product nor any information contained in the Product shall be considered as advertising the securities or making recommendation of the securities in the Republic of China (Taiwan). The Product is for informational purposes only and is not intended as an offer or solicitation for the purchase or sale of a security or financial products. Any decision to purchase securities or financial products mentioned in the Product must take into account existing public information on such security or the financial products or any registered prospectus.

The Product is made available in **Thailand** through Citicorp Securities (Thailand) Ltd., which is regulated by the Securities and Exchange Commission of Thailand. 399 Interchange 21 Building, 18th Floor, Sukhumvit Road, Klongtoey Nua, Wattana, Bangkok 10110, Thailand.

Disclosure for investors in the Republic of Turkey: The Product is made available in **Turkey** through Citibank AS which is regulated by Capital Markets Board. Tekfen Tower, Eski Büyükdere Caddesi # 209 Kat 2B, 23294 Levent, Istanbul, Turkey. Under Capital Markets Law of Turkey (Law No: 6362), the investment information, comments and recommendations stated here, are not within the scope of investment advisory activity. Comments and recommendations stated here rely on the individual opinions of the ones providing these comments and recommendations. These opinions may not fit to your financial status, risk and return preferences. For this reason, to make an investment decision by relying solely to this information stated here may not bring about outcomes that fit your expectations. Furthermore, Citi Research is a division of Citigroup Global Markets Inc. (the "Firm"), which does and seeks to do business with companies and/or trades on securities covered in this research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report, however investors should also note that the Firm has in place organisational and administrative arrangements to manage potential conflicts of interest of this nature.

In the **U.A.E**, these materials (the "Materials") are communicated by Citigroup Global Markets Limited, DIFC branch ("CGML"), an entity registered in the Dubai International Financial Center ("DIFC") and licensed and regulated by the Dubai Financial Services Authority ("DFSA"), license #CLO221 to Professional Clients and Market Counterparties, as defined in DFSA regulations, only and should not be relied upon or distributed to Retail Clients. Financial products and/or services to which the Materials relate will only be made available to Professional Clients and Market Counterparties. Citigroup Global Markets

Limited DIFC Branch registered address is Level 3, Gate District Building 02, Dubai International Financial Centre and can be contacted on +971 4 509 97 90.

The Product is made available in **United Kingdom** by Citigroup Global Markets Limited, which is authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA. This material may relate to investments or services of a person outside of the UK or to other matters which are not authorised by the PRA nor regulated by the FCA and the PRA and further details as to where this may be the case are available upon request in respect of this material. Citigroup Centre, Canada Square, Canary Wharf, London, E14 5LB.

The Product is made available in **United States** and **Canada** by Citigroup Global Markets Inc., which is a member of FINRA and registered with the US Securities and Exchange Commission. 388 Greenwich Street, New York, NY 10013.

Unless specified to the contrary, within EU Member States, the Product is made available by Citigroup Global Markets Europe AG ("CGME"), which is regulated by the European Central Bank and the German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht-BaFin).

The Product is not to be construed as providing investment services in any jurisdiction where the provision of such services would not be permitted.

Subject to the nature and contents of the Product, the investments described therein are subject to fluctuations in price and/or value and investors may get back less than originally invested. Certain high-volatility investments can be subject to sudden and large falls in value that could equal or exceed the amount invested. The yield and average life of CMOs (collateralized mortgage obligations) referenced in this Product will fluctuate depending on the actual rate at which mortgage holders prepay the mortgages underlying the CMO and changes in current interest rates. Any government agency backing of the CMO applies only to the face value of the CMO and not to any premium paid. Certain investments contained in the Product may have tax implications for private customers whereby levels and basis of taxation may be subject to change. If in doubt, investors should seek advice from a tax adviser. The Product does not purport to identify the nature of the specific market or other risks associated with a particular transaction. Advice in the Product is general and should not be construed as personal advice given it has been prepared without taking account of the objectives, financial situation or needs of any particular investor. Accordingly, investors should, before acting on the advice, consider the appropriateness of the advice, having regard to their objectives, financial situation and needs. Prior to acquiring any financial product, it is the client's responsibility to obtain the relevant offer document for the product and consider it before making a decision as to whether to purchase the product.

Card Insights. Where this report references Card Insights data, Card Insights consists of selected data from a subset of Citi's proprietary credit card transactions. Such data has undergone rigorous security protocols to keep all customer information confidential and secure; the data is highly aggregated and anonymized so that all unique customer identifiable information is removed from the data prior to receipt by the report's author or distribution to external parties. This data should be considered in the context of other economic indicators and publicly available information. Further, the selected data represents only a subset of Citi's proprietary credit card transactions due to the selection methodology or other limitations and should not be considered as indicative or predictive of the past or future financial performance of Citi or its credit card business.

Citi Research product may source data from dataCentral. dataCentral is a Citi Research proprietary database, which includes the Firm's estimates, data from company reports and feeds from LSEG Data & Analytics. The source for all referenced prices, unless otherwise stated, is DataCentral. Past performance is not a guarantee or reliable indicator of future results. Forecasts are not a guarantee or reliable indicator of future performance. The printed and printable version of the research report may not include all the information (e.g. certain financial summary information and comparable company data) that is linked to the online version available on the Firm's proprietary electronic distribution platforms.

Where included in this report, MSCI sourced information is the exclusive property of Morgan Stanley Capital International Inc. (MSCI). Without prior written permission of MSCI, this information and any other MSCI intellectual property may not be reproduced, disseminated or used to create any financial products, including any indices. This information is provided on an "as is" basis. The user assumes the entire risk of any use made of this information. MSCI, its affiliates and any third party involved in, or related to, computing or compiling the information hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of this information. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates or any third party involved in, or related to, computing or compiling the information have any liability for any damages of any kind. MSCI, Morgan Stanley Capital International and the MSCI indexes are services marks of MSCI and its affiliates. Where data is attributed to Morningstar that data is © 2026 Morningstar, Inc.
